Boosting EU Biodiversity STrategy by empowering high education curricula and green skills for NATURE protection and restoration

Are you passionate about preserving our planet's natural wonders? Participate in the BESTNATURE ERASMUS+ cooperation

Join international researchers on an incomparable learning journey on the topic of **green skills for nature protection and restoration**. Our online course offers **flexible e-learning** tailored to your schedule starting in autumn 2025 and secure your spot for the **BESTNATURE Field Week** in the stunning **Nationalpark Gesäuse (Austria)** from September 19 until 24.

Gain invaluable practical field experience and expand your network with fellow enthusiasts and experts.

The BESTNATURE blended model aims to **train Bachelor, Master and PhD students** on the themes of the **European Biodiversity Strategy for 2030**. The Partnership, involving Italy, Austria, and Germany, will provide future professionals and researchers with **advanced knowledge and skills on interdisciplinary biodiversity monitoring**.

Our lectures range from the theoretical understanding of ecosystems to the hands-on application of cutting-edge monitoring technologies in real-world

settings for an effective management of protected areas. Through our **"Theory and application in biodiversity conservation"** course you can get 6 ECTS.

- 1) Module A: e-learning (3 ECTS)
- 2) Module B: BESTNATURE Field Week with practical activities (3 ECTS)

Concerned about finances? Don't fret! The e-learning online course is open-access and limited funding opportunities are available for participants of our BESTNATURE Field Week.
